

# CIMARRON URUGUAYO

## Official UKC Breed Standard

Guardian Dog Group

©Copyright 2006, United Kennel Club

The goals and purposes of this breed standard include: to furnish guidelines for breeders who wish to maintain the quality of their breed and to improve it; to advance this breed to a state of similarity throughout the world; and to act as a guide for judges.

Breeders and judges have the responsibility to avoid any conditions or exaggerations that are detrimental to the health, welfare, essence and soundness of this breed, and must take the responsibility to see that these are not perpetuated.

Any departure from the following should be considered a fault, and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog and on the dog's ability to perform its traditional work.

### HISTORY

The origin of the Cimarron Uruguayo is uncertain, though it is thought to be descended from dogs that were brought into Uruguay by the Spanish and Portuguese conquerors. The dogs that were left behind bred amongst themselves, and only the fittest survived. Eventually, the people of the region recognized the value of the dogs and domesticated them for use as guard, herding and big game hunting dogs.

The Cimarron Uruguayo was recognized by the United Kennel Club in 2006.

### GENERAL APPEARANCE

Medium-sized, strong, compact and agile.

### CHARACTERISTICS

Intelligent and courageous.

### HEAD

**SKULL** - The skull is wider than it is long, with a slight occipital protuberance. There is a moderate stop.

**MUZZLE** - The muzzle is broad and powerful, only slightly shorter than the skull. The upper lips cover the lower lips, but there are no pendulous flews. The cheeks are well-developed, but not bulging.

**TEETH** - The Cimarron Uruguayo has a complete set of evenly-spaced, white teeth meeting in a scissors bite.

*Disqualifications:* Undershot or overshot.

**NOSE** - Broad and black.

**EYES** - The eyes are medium-sized, almond-shaped, and any color of brown, though in accordance with the coat color, darker is preferred. The eye rims are tight-fitting and fully pigmented. The expression is inquisitive.

**EARS** - The ears are medium-sized and triangular in shape; dropped, but they do not hang close to the cheeks. The ears may be cropped in a rounded shape such as like a puma ear. There should not be more than half the ear removed.

### NECK

Strong, well-muscled, and not too long.

### FOREQUARTERS

The shoulder blades and upper arms are approximately the same length, and are well laid back.

**FORELEGS** - The legs are straight, with strong bone, and the elbows are held close to the body. The length of the leg from elbow to ground is one half the height at the withers. The pasterns are slightly sloping.

### BODY

The body is slightly longer than tall. The chest is deep to the elbow, and broad, with well developed forechest. The ribs are well-sprung but not barrel shaped. The withers are well-defined, and the topline is level or slightly saddle shaped. The loin is short, strong and slightly arched. The croup is long and broad, sloping at 30 degrees off the horizontal.

### HINDQUARTERS

The hindquarters are well muscled and powerful. The dog stands with its hipbones at the same level as its withers.

**HIND LEGS** - The upper thighs are well-developed, and the stifles are well-angulated. The rear pasterns are of medium length.

**FEET**

The front feet are oval-shaped, with strong pads and well-knit toes. The hind feet are round and tight.

**TAIL**

The tail is thick and moderately low set, reaching to the hock. At rest, it is carried low. In motion, it is carried horizontally or with a slight upward curve.

**COAT**

Short, smooth and close, with undercoat.

*Disqualification:* Distinctly long coat.

**COLOR**

Brindle and all shades of fawn, with or without a mask or black shading. White markings are allowed on the underjaw, lower part of the neck, forechest, abdomen and lower part of the legs.

*Serious Fault:* White markings, except as specified.

*Disqualification:* Any color not mentioned.

**HEIGHT AND WEIGHT**

Acceptable height for males is 23-24 inches, with a tolerance of  $\frac{3}{4}$  of an inch either way. Acceptable height for females is 21.5-22.5 inches, with a tolerance of  $\frac{3}{4}$  of an inch either way.

Males weigh between 84-100 pounds; females between 73-88 pounds.

*Serious Fault:* Over or under the tolerated size.

**GAIT**

Free and effortless, with good reach and drive. As speed increases, the legs converge towards a center line of travel.

**DISQUALIFICATIONS**

*(A dog with a Disqualification must not be considered for placement in a conformation event, and must be reported to UKC.)*

Unilateral or bilateral cryptorchid.

Viciousness or extreme shyness.

Undershot or overshot.

Albinism.

Distinctly long coat.

Any color not mentioned.
