

# EPAGNEUL BLEU DE PICARDIE

## Official UKC Breed Standard

Gun Dog Group

©Copyright 1996, United Kennel Club

The goals and purposes of this breed standard include: to furnish guidelines for breeders who wish to maintain the quality of their breed and to improve it; to advance this breed to a state of similarity throughout the world; and to act as a guide for judges.

Breeders and judges have the responsibility to avoid any conditions or exaggerations that are detrimental to the health, welfare, essence and soundness of this breed, and must take the responsibility to see that these are not perpetuated.

Any departure from the following should be considered a fault, and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog and on the dog's ability to perform its traditional work.

### HISTORY

The Blue Picardy Spaniel is descended from the old French spaniels that were crossed with blue Belton English Setters and Gordon Setters. The presence of the first black blue/grey coated spaniel was recorded in 1875. In 1921 the Picard Spaniel and Blue Picardy Spaniel Club was formed. The Blue Picardy Spaniel was classified as a separate breed because of its distinctive coat and skin color.

The Epagneul Bleu de Picardie was recognized by the United Kennel Club January 1, 1996.

### GENERAL APPEARANCE

Quite low to the ground dog, well built for work, a true Picardy spaniel.

### CHARACTERISTICS

Gentle, intelligent and willing to please, very adaptable, and possessing a strong natural hunting instinct.

### HEAD

**SKULL** - Relatively wide and oval in shape, with a slight occipital crest. The stop is moderate but marked.

*Faults:* Narrow skull. Lack of chiseling.

**MUZZLE** - Quite long and broad, with thick, pendulous lips that form a square muzzle in profile.

*Fault:* Pointed muzzle.

**TEETH** - The Epagneul Bleu de Picardie has a complete set of evenly spaced, white teeth meeting in a scissors bite.

**NOSE** - Broad, with well opened nostrils.

**EYES** - The large, well opened eyes are dark in color, and show a calm expression.

*Faults:* Light eyes, small eyes.

**EARS** - Set slightly above eye level, with thick leather that reaches to the end of the nose, the ears are covered with beautiful wavy, silky hair.

*Faults:* Short ears. Thin leather. Ears set too high.

### NECK

Well set. A slight dewlap is permitted.

### FOREQUARTERS

The shoulder blade and upper arm are slightly oblique.

**FORELEGS** - Strong and well muscled.

### BODY

The chest is of medium depth. The ribs are nicely sprung, and descend to the elbow. The back and loin are strong, and not too long. The croup is slightly sloping.

*Faults:* Flat ribs or barrel ribs.

### HINDQUARTERS

**HIND LEGS** - The upper thighs are well muscled. The lower thighs are long, and well furnished. There is good angulation at the hock, and the rear pasterns are well furnished.

### FEET

The feet are round, a little broad, but not flat, and well furnished with hair between tightly closed toes.

*Faults:* Feet flat, splayed or too broad.

**TAIL**

The tail reaches approximately to the hock joint, and is straight.

**COAT**

Flat or slightly wavy, with good furnishings on the legs and tail.

**COLOR**

Grey/black speckled, which forms a bluish shade, with black patches.

**HEIGHT AND WEIGHT**

Height at the withers for males is 22.5 to 23.5 inches; slightly less for females.

**DISQUALIFICATIONS**

*(A dog with a Disqualification must not be considered for placement in a conformation event, and must be reported to UKC.)*

Unilateral or bilateral cryptorchid.

Viciousness or extreme shyness.

Albinism.
